- General technical support, when needed.

PROJECTS

Animehub

Stack: React, Redux Toolkit, PostCSS, HTML, CSS

A personal side project made from scratch with React, Typescript, Redux Toolkit and PostCSS using Kitsu API to explore anime titles. It is designed to showcase my web development skills, especially React and CSS.

Sthetica (ecommerce)

Stack: React, Redux Toolkit, TailwindCSS, ComerceJS

An artwork ecommerce project made with React, Typescript, Redux Toolkit, TailwindCSS and CommerceJS. It also has Stripe integration, ensuring security best practices in payment processing.
